

Welcome,

Thank you for participating in the NABCEP PV Entry Level Examination. The exam consists of 65 questions. You have 130 minutes to complete the exam.

All questions on the exam are multiple choice and have only one correct answer. Some questions require calculations for which you can use either the on screen calculator provided, or your own calculator if you brought one.

Prior to beginning the exam, you will have up to 5 minutes to accept the non-disclosure (NDA) agreement, PV Entry Level Notice and Agreement and the Release of Scores. If you want to take a break at any time during your exam, please notify the proctor and follow the procedures for the test center. Any break time will be counted against the 130 minute exam time.

You have the opportunity to move forward and backward through the questions. You will be allowed to mark questions for review if you are unsure of your answer. At the end of the exam, you will be provided with a review page showing all items you have marked for review and any items that have not been answered, allowing you the opportunity to return to these questions if time permits.

NABCEP values your feedback but please keep in mind that the clock will continue to count down while you are making your comments.
