**Product:** Product and Experience Design with AI Using Adobe Firefly exam content

**Product description:** “Product and Experience Design with AI Using Adobe Firefly” is an Adobe Certified Professional exam. The exam is designed for professionals, post-secondary students, and advanced secondary students with approximately 150 hours of instruction and/or hands-on experience in planning for, creating, generating, and refining assets with Adobe Firefly. The exam requires candidates to demonstrate knowledge of the core tasks required in professional use of Firefly and the design process, features of Firefly and other generative AI tools, and how to use Firefly within the Adobe ecosystem.

This exam includes only Selected Response (SR) questions. It does not include Live in the Application (LITA) tasks in which the test-taker works directly in the exam application. The exam content is delivered in the Adobe Certified Professional Exam Driver, a third-party product created and maintained by Internet Test Systems (ITS) for Certiport.
