

Unproctored Technical Requirements

These technical requirements apply to any Unproctored Internet Based Testing (IBT) tests.

Virtual machines and other virtual environments are not supported.

Operating System

- **Windows 11** with Live Tiles disabled
- The current version of **macOS** and the two previous versions

RAM

You need at least **4 GB of RAM**.

Display

- **Minimum resolution:** 1024 × 768 with 16-bit color
- **Recommended resolution:** 1920 × 1080 or higher with 32-bit color

Internet browser

- **Microsoft Edge:** Use the current version
- **Google Chrome:** Use the current version
- **Safari:** Use the current version or one of the two previous versions

Internet connection

A broadband internet connection is required. Your connection must support at least **40 Mbps download** and **40 Mbps upload**.

Unproctored Technical Requirements

Browser settings

On **Mac** devices, browser cookies must be enabled to take the test.

On **Windows** devices, cookies are not required but enabling them may improve your experience.

Firewalls and VPNs

Corporate firewalls and VPNs can prevent the test from working correctly. If possible, take the test on a network that does not use a corporate firewall or VPN.
