

Deliver an end-to-end skilling experience

The Pearson Skilling Suite is a comprehensive, all-in-one solution for training, hands-on practice, and certification.

Offer an integrated skilling experience that prepares learners at all levels for today's high-demand technology professions. The skilling suite gives you everything you need to manage and deliver high-quality technology training that helps learners master concepts, develop hands-on skills, and prepare for certification. All backed by Pearson and our decades of experience supporting learners and training leaders around the globe.

A better experience for learners, instructors and you

The Pearson Skilling Suite is a scalable solution that helps you cost-effectively manage and deliver training, whatever your current requirements.

Efficient

Consolidate all your skilling components—courses, labs, practice tests, and certification testing—into a single solution, for easier management and a seamless learner experience.

User-Friendly

Give learners and instructors an intuitive interface that's easy to use and access, anytime and anywhere.

Cost-effective

Provide a broad spectrum of affordable courseware for top technology providers like Microsoft, CompTIA, AWS, Cisco, VMware, and more—and on trending topics like AI, cloud computing, and cybersecurity.

Flexible

Offer multiple learning formats to accommodate learner preferences, schedules, and locations.

Pearson is recognized by the Learning Performance Institute (LPI) for commitment to continual performance improvement, and high levels of quality and service.

Everything you need to skill—in one offering

The Pearson Skilling Suite supports your organization's skilling goals, enhances learner engagement, delivers a better instructor experience, and streamlines training management.

Easy training management

Lower your administrative load with tools that help you manage instructors, assign seats, view license inventory, track student progress, and much more.

Continuous content updates

Ensure you're offering current and relevant courseware aligned to the latest exam requirements.

Certification Exam Pass Pledge

Give learners who use the certification prep resources a second opportunity to take the vendor exam within 30 days of their last practice test.

Contextualized training labs

Let learners test their knowledge and practice new skills in a hands-on, live environment.

Practice tests

Provide a tool to increase learners' certification readiness and positively impact pass rates.

Instructor support materials

Supply instructors with video lectures, pre-built PowerPoint presentations, reading materials, and interactive exercises

All-in-one training, practice, and certification prep

Reduce cost and streamline operations—no need to manage multiple vendors and systems.

Integration options

Connect to your Learning Management System (LMS) to gain efficiency and lower your administrative burden.
