

Professional Assessments

## ExamDeveloper™

The all-in-one tool that takes the stress out of exam development

## A simpler way to develop exams

A clear, reliable way to build exams—securely, efficiently, and with confidence

### Easy as 1-2-3

Use ExamDeveloper™ to collaborate with subject matter experts and manage content throughout the entire development cycle. Experts can write and review content together in a secure online space. You can even assign tasks with the “auto-assign” feature.

### Top-quality items

Produce high-quality, trusted exams with customizable workflows, including editorial review and item validation.

### The experts' tool of choice

Use the same tool trusted by our own psychometricians and content developers.

### Built-in security

Security is central to ExamDeveloper. Manage user privileges so people working with exam content see only what they need. The tool also maintains an auditable history of all items.

## Intelligent design

Make item creation even more efficient with Item Assist, the AI tool that helps subject matter experts create quality first-draft exam items faster. The AI-generated content can then be reviewed, edited, and integrated into the ExamDeveloper workflow.

## The right exam type

Build standard linear, Adaptive, or LOFT exams. Choose the exam type that fits your program best.

## Train to succeed

When you get started, we'll train you in three sessions. A robust help section with tutorial videos lets you get the most out of ExamDeveloper.

## Save time, skip the travel

Because it's web-based, your subject matter experts can work together from anywhere—no flights required.
